Instructional design must be responsive to the characteristics of prospective learners. 

Examples:
- Round-table discussions on a specific case, topic, or problem.
- Using the available classroom or other materials, the Instructional Designer can engage students in active learning.

Examples:
- Students may enter the cycle at any point, which can be done when they feel ready.
- Students are actively involved in the learning process and a main activity is solving problems.

At one time, our field was known as Instructional Systems Design (ISD). LX design would avoid those problems. Examples:
- Yahoo.com, Hotmail.com, etc.
- Some course examples include Instructional Design & Development and Learning Instructional Computing I.

Instructional Computing I, Issues and Current Research in Educational Computing, describe the issues, findings, and trends in recent developmental research, and Tracey's (2002) study is an example of Type 2 developmental research that has been published in the field of instructional design.

Instructional design for everyone interested in instructional design, improving training.
